### To Whom it may concern

### Discontinuation of NH fuse-switch-disconnectors series LTL (Horizontal)

Dear Valued Customer,

We are going to discontinue production of part of the NH fuse-switch-disconnectors series LTL by the end of 2017. (discontinued range will be DIN size 000-3, 630A and below)

The electrical performance and safety requirements for fuse-protected switchgear have changed fundamentally during recent years.

There is an industry wide increased expectation to:

- Increase short circuit strength and switching capacity
- Improved touch protection and operator safety
- Easier assembly within restricted dimensional envelopes
- Enhanced flexibility and modularity with ability to work in combination with other devices
- High system integration

Jean Mueller recognised that a new solution was required to meet the electrical industry requirements, a solution based on the existing LTL heritage and footprint, so ...

The answer is **KETO**

The series of NH fuse-switch-disconnector KETO has now been on the market for more than one year and has already been adopted as an alternative to LTL by many customers and end users.

You will also benefit from the multiple advantages which KETO offers.

There is more detailed information available on our website to aid an easier transition and replacement of LTL with the KETO series.

Your JEAN MÜLLER teams locally and with support from the manufacturing facility in Germany will be pleased to help you with any questions and solutions regarding the choice of the right KETO device and the appropriate accessories to meet your requirements.

The continued supply of spare parts for the LTL series is ensured. However, due to a change in the production method you can expect extended delivery times from 2018 onwards.

## **Discontinuation of NH fuse-switch-disconnectors series LTL (Horizontal)**

---

The following special versions from the LTL series will continue to be produced past the end of 2017:

- NH fuse-disconnector for DC applications
- NH fuse-disconnector for voltages > 1000V
- NH fuse-switch-disconnector with metal chassis
- NH-fuse-switch-disconnector in slim design for 60mm busbar system
- \*NH fuse-switch-disconnector size 4a (>630A per phase)
