About Jean Muller (New Zealand) Limited

Jean Muller has a long history in New Zealand and is proud to supply electrical components and systems for electrical industry customers throughout the country and the Pacific.

Locally, we're known for our reliability, responsiveness and technical support. We also provide customised solutions for specific customer applications. These bespoke solutions are designed,

assembled and manufactured locally using the high standards, precision and customer support Jean Muller is known for the world over.

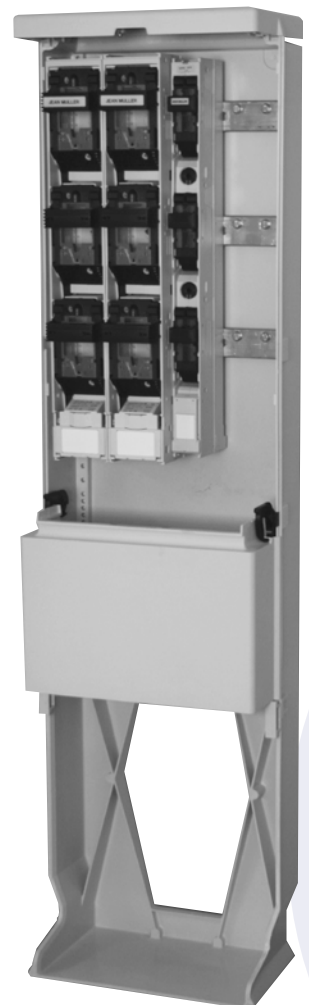

With our specialist knowledge of local electrical supply industries and backed by more than 100 years of German expertise and innovation, you're in safe hands with Jean Muller.

Jean Muller NZ Ltd. Taranaki, New Zealand.

Capabilities

- Cable distribution cabinets
- Tinned copper bus bars
- LV racks and frames
- Free standing and surface mounted LV fused disconnect panels
- Tinned copper earth and neutral bars
- Customised bespoke solutions for LV electrical distribution

Customised Solutions

Flexible and experienced with in-depth knowledge of industry needs, you can benefit from our in-house expertise, workshop capability and customised solutions. We regularly manufacture tailored products and solutions to meet our customers' specifications.

We pride ourselves on our ability to listen and interpret your needs, providing you with a solution that meets your requirements. Simply provide details and we can turn it into a complete product – eliminating your pinch points, saving time and creating cost-effective solutions.

German Heritage

Jean Muller is an independent family business founded in 1897 in the village of Eltville on the banks of the Rhine River in Germany.

Today the company has more than 600 employees who work with modern production methods to produce products that are used around the world.

Products

Jean Muller supplies niche fused switchgear, low voltage switchgear assemblies, current distribution components, electronic monitoring systems and energy management systems. Our current distribution components are used for electrical power supply in industrial applications, large buildings, offices, factories, ships and airports.

Our tried and tested products comply with international IEC standards and with New Zealand standards. Our products are manufactured in line with the highest quality requirements, and our quality management is certified according to ISO 9001 : 2015, ISO 14001 : 2015.

Expertise & Innovation

Jean Muller is known for its state-of-the-art production and as a technology centre for the Jean Muller network worldwide.

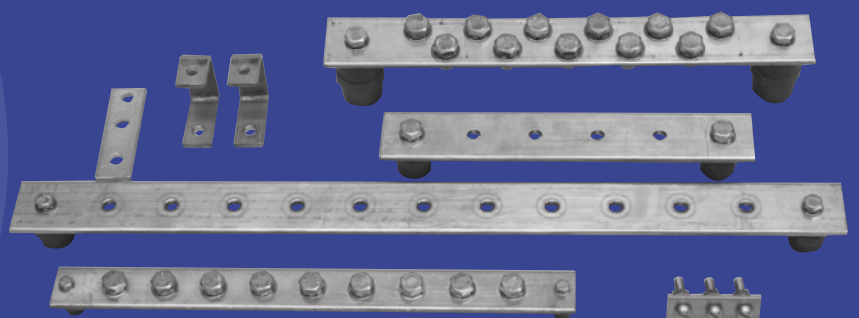

As direct representatives of Jean Muller locally, we take pride in using products and processes that we know are of the highest quality, long-lasting and backed by 100 years of expertise.

Continuity of Supply

Exceptional customer service is at the heart of everything we do, from same-day quoting, including handy drawings, to speaking directly to your customers to clarify their requirements.

Our customers enjoy reliable and responsive service with our extensive range (warehoused in New Zealand) and we're able to deliver components and customised solutions on time, every time.

We treat each order like we're part of your company and aim to seamlessly deliver and add value by always going the extra mile for our customers.
