

31 July 2020

Dear Customer,

Subject: KETO Series Cover Change

The front panels of the horizontal fused switch disconnects in the KETO series are going to be produced with a black cover instead of blue due to a change in the supply of coloured plastic.

Please be assured there is no change to the sizing, performance or quality of the KETO series disconnects as we make this colour change.

You will see a change to the black covers in our catalogue and other marketing over the next few months, but as always we have a good supply of disconnects in stock, so you will not receive the new black covered KETO series immediately. Current orders will be filled with blue stock.

Please continue to place orders for the range in the usual way.

If you have any questions please do not hesitate to get in contact with one of the team.

Regards

**Mark Ellerton**
